

## ADVANCED ENGINEERING BUSINESS OPPORTUNITIES IN CHINA & INDIA 10 FEBRUARY 2010 IN WESTON-SUPER-MARE

**UK Trade & Investment, in partnership with West of England Aerospace Forum, is hosting a China & India Advanced Engineering Business Opportunities Briefing on 10 February 2010.**

With the rapid growth of the Chinese and Indian aerospace and automotive sectors, value chain opportunities are emerging in all areas of advanced engineering. Excellent opportunities exist for high-level UK advanced engineering companies to supply goods and services to China and India. Now is the time for UK companies with relevant capability to meet the needs of Chinese and Indian aerospace and advanced manufacturing customers. The seminar will be held in the afternoon during the WEAFA Annual Conference in Weston-super-Mare.

**Event Date: - Thursday 10 February 2010**

Over the last 9 months, UK Trade & Investment has deployed specialists to identify opportunities in automotive, aerospace and clean manufacturing, with two of the specialists having recently completed short secondments in China. Paul Calver, UKTI's Advanced Engineering Global Value Chain Specialist for China and India, has been engaging with key OEMs in both markets. At this event Paul will outline in practical terms how UK companies can fully exploit supply chain opportunities in China and India. There will also be presentations on aerospace supply chain and clean manufacturing opportunities in China.

By attending this event, you will improve your company's knowledge and capability in the following key areas:

- Key market drivers and trends
- Principal China and India business opportunities
- Market entry and methods of doing business, including business culture
- Network of UKTI support in China and India
- Specific opportunities for 2nd & 3rd tier UK manufacturers in India.

Updates can be found on the UKTI website [www.uktradeinvest.gov.uk](http://www.uktradeinvest.gov.uk)

Places will be limited, so to register for this event contact:
